Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed. The claims are directed to an "Apparatus for making photographic-quality prints".

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 18 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Wilson Woodruff (US 3,415,771).

As to claim 18, Wilson Woodruff discloses, in coating composition for treating image bearing transparencies, an apparatus or a machine for producing photographic-quality prints (see column 1, lines 26-28), comprising: an imager (hand tool or machines) for providing an image to a surface of a transparent carrier (see column 3, lines 15-18; column 5, lines 27-39); and an undercoat module (any suitable manner of dipping, rolling, doctoring or spraying, see column 4, lines 10-14) for applying a particle-based undercoat (see column 1, lines 12-15) to the surface of the transparent carrier, such that at least a portion

Art Unit: 1734

of the image is considered to be between the transparent carrier and the particle-based undercoat.

With respect to claim 20, In Wilson Woodruff (see column 5, line 59) the imager is capable of providing a reverse image (negative).

4. Claims 18 and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by Van Brimer et al (US 4,853,706).

As to claims 18 and 19, Van Brimer et al discloses an apparatus for producing photographic-quality prints (see Fig 1a and column 1, lines 26-28), comprising: an inkjet imager (see Fig 1a) for providing an image to a surface of a transparent carrier (18 transparency); and an undercoat module (brush or contact applications, see column 5, lines 55-59 and column 6, lines 1-2) capable of applying a particle-based undercoat to the surface of the transparent carrier, such that at least a portion of the image is considered to be between the transparent carrier and the particle-based undercoat.

With respect to claim 19, In Van Brimer et al the imager is capable of providing a reverse image.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Morrison (US 2,751,294) discloses spraying or brushing a liquid composition containing particles (see column 6, lines 30-36). Omo et al (US 4,788,563) discloses an inkjet recording apparatus forming a reverse image (see claims 5 and 7)

Response to Arguments

6. Applicant's arguments, filed 08/25/2005, with respect to the rejection(s) of claim(s) 18-20 with reference Wo'542 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made (see above).
